

Spray extraction cleaner

KÄRCHER Puzzi 100

The compact machines are designed for deep-cleaning carpeted floors: Cleaning solution is applied to the pile via a spray nozzle and immediately vacuumed away again by a suction nozzle. In the case of stubborn dirt and stains, the affected areas are pre-sprayed to allow the cleaning agent to act for longer. As the residual moisture content is low (no more than 10 - 15%), it is possible to walk on cleaned carpets after a short period. A hand nozzle is used for cleaning upholstered furniture, car seats, stair carpets, etc. Hard-surface adapters enable the unit to be used for linoleum, PVC, stone and ceramic surfaces.

One interesting feature of the machines is the sound-proofed service module which accommodates the easily accessible fan and pump motor. Only four screws have to be released for simple, time-saving replacement of parts for maintenance or repair. A transparent floor nozzle enables the operator to keep a constant check on the condition of the area just treated. The handle is designed in such a way that the floor nozzle can be clipped to it so that the lightweight units can be carried in one hand.

The robust spray-extraction cleaners are rated for daily commercial applications: The suction hose is metal reinforced and the housing is made of tough polypropylene which is highly resistant to chemicals. Main users of these convenient units are rental businesses, automotive workshops, contract cleaners, restaurants, hotels, retailers and private households.

Fresh water tank with filter element allows long periods of operation and protects the pump from soiling. Two large wheels and two castors for excellent manoeuvrability. Pushbuttons for spraying and vacuuming modes conveniently are positioned on top of the unit. Easily removed transparent suction dome enables recovery performance to be checked at a glance. The 9-litre dirt water tank simply lifts out.

Standard accessories

Floor tool
Hand tool
Spray hose with integral water feed 2,5 m

Part no. 1.100-107.0

TECHNICAL SPECIFICATIONS

Dimensions (L x W x H)	665 x 320 x 435 mm
Max. performance	25 m ² /h
Weight	10,3 kg
Power rating, pump	40 W
Power rating, fan	1250 W
Air flow rate	54 l/s
Spray rate	1 l/min
Vacuum	220/22 mbar/kPa
Tank, fresh/dirty water	10/9 l
Spray pressure/ram pressure	1-2,5 bar
