

Wet & Dry Vacuum Cleaner

KÄRCHER NT 361 Eco

The small NT 361 eco wet and dry vacuum is a particularly user-friendly unit which is ideal for universal applications, e.g. in the trades, contract cleaning, car dealers and private households.

One very practical feature of the new vac is the flat pleated filter, which offers some essential benefits: The user can alternate between wet and dry pickup without any interruption because the filter element is always above the fluid level. Access to the filter is quick and simple because it is not necessary to remove the motor headfirst. The flat pleated filter increases useful capacity of container since it does not project downwards. Power Filter Clean System, filter cleaning via remote control ensures constant suction power.

The electronic level monitor automatically switches the fan motor off when the maximum liquid level is reached. The unit has two large diameter wheels at the rear and two castors at the front for high stability and maneuverability, it is also light enough to be carried without difficulty. A large On/Off-switch as well as holders for storage of the cable and accessories on the unit offers additional user convenience.

Standard Accessories

- Auto shutdown when max. level is reached
- Caster with brake
- Crevice tool
- Eco filter system
- Filter bag Paper
